The World in Fast Forward

A Sneak Peek at the Jobs of Tomorrow from CES 2021

Get the catalyst paper, training deck, and activity sheets to help you and your team explore leading trends from CES® 2021 and orient to the future of a technology sector accelerated by COVID-19.

“COVID-19 just ran the tape out on the next decade and accelerated the impact of technology on every industry. Catching up to where the world has gotten to without us is going to be a h*ll of a ride.”

—Shawn Nason, CEO and Ecosystem Disruptor, MOFI

Let's face it, 2020 was ravaged by, among others things, COVID-19, and the technology sector responded by gunning it into high gear.

What does an accelerated technology sector mean?

It means, among other things, that the **in-demand skills and jobs of the future are being pulled into the present.** To explore these impacts the MOFI team classified trends in **nine prominent industry sectors highlighted at CES** and imagined jobs that don't yet exist, but seem just around the corner, to engage this content.

Let's explore where these industry sectors are headed and prepare ourselves to be ready to thrive in a rapidly transforming world.

Sector Recaps, Trends, and Jobs of the Future of ...

- The Fan Experience
- Education
- Work
- Supply Chains
- Personal Health
